

# ORIGAMI STAR

1

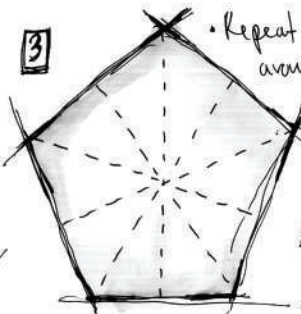

• Start your star with an accurate pentagon.

2

• Fold in half

3

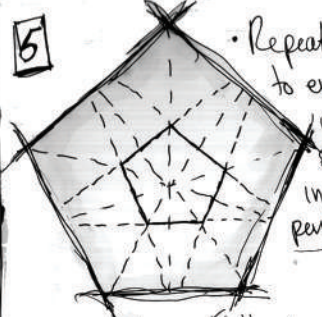

• Repeat the process all the way around until you have five folds.

4

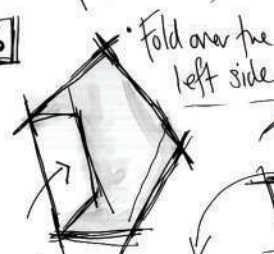

• Fold the bottom side up so that the two corners meet the cross folds.

5

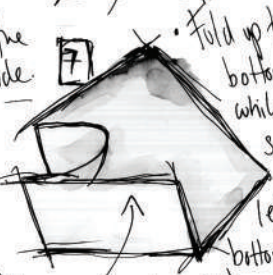

• Repeat this process to every side until you have a smaller pentagon inside your large pentagon.

6

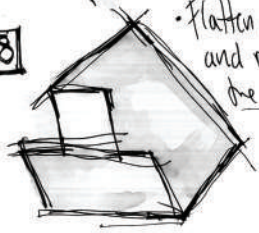

• Fold over the left side

7

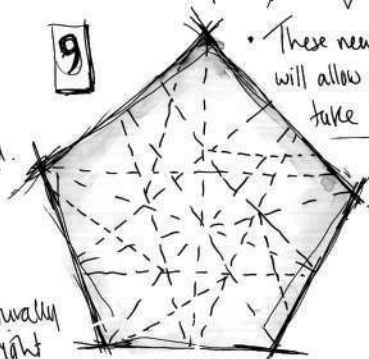

• Fold up the bottom side while making sure to pull the left side bottom corner out.

8

• Flatten down and repeat all the way round.

9

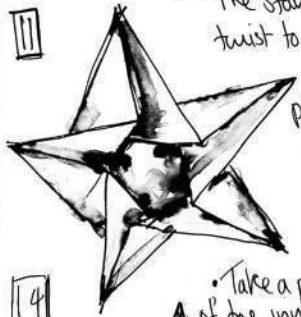

• These new folds will allow the star to take its shape.

10

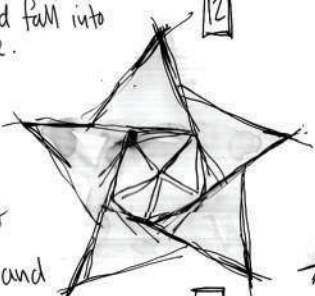

• Pinch the corners and pull the sides into the centre

11

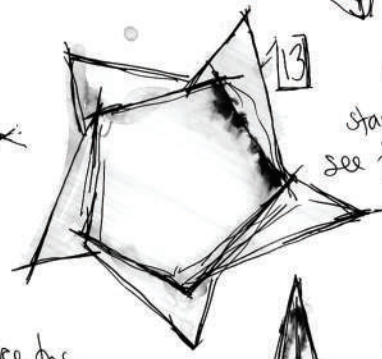

• The star will naturally twist to the right and fall into place.

12

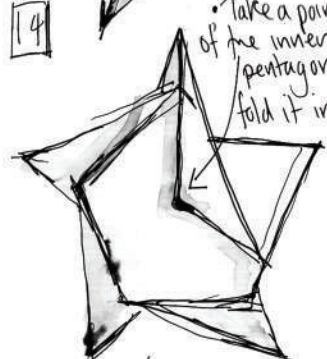

13

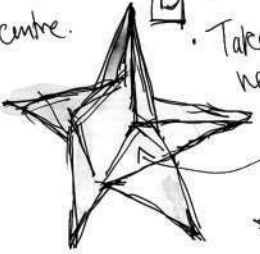

• flip the star around to see the back

14

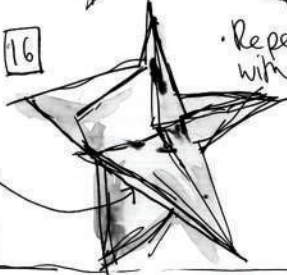

• Take a point of the inner pentagon and fold it into the centre.

15

• Take the next point and fold into centre again.

16

• Repeat with all the points

• Tuck in the final point to complete your star!
